Chairman's Statement

To all shareholders,

On behalf of the board (the “Board”) of directors (the “Directors”) of China Hongqiao Group Limited (the “Company” or “China Hongqiao”), I am pleased to announce the unaudited consolidated interim results of the Company and its subsidiaries (collectively, the “Group”) for the six months ended 30 June 2018 (the “Period” or “Period under Review”).

In the first half of 2018, the world economy struggled to move forward amid the many challenges. Despite that the world economy has maintained its growth momentum driven by the early-stage recovery and relevant policies, the fundamentals of the recovery were still not stable. China's domestic structural adjustment was also at a critical point, the Chinese government has launched a new round of reform and opening up measures in the past six months. The structural adjustment has advanced further, and the Gross Domestic Product (GDP) in China continued with steady development on a solid foundation, posting a year-on-year growth of approximately 6.8%. However, due to unfavourable factors such as the heated international trade protectionism, certain businesses of the Group may still face different uncertainties in the future. The Group will monitor closely the situation and seek opportunities to actively cope with the challenges.

During the Period, the Group maintained its base in Shandong with a vision on the global market. It endeavoured to accelerate the industrial cluster development through the business model of “Integration of Aluminum and Electricity”, “Integration of Upstream and Downstream Businesses” and “Global Integration”, which further enhanced the Group's management standard. During the Period, the Group continued to accelerate the process of replacement of new production facilities. The 600kA aluminum electrolytic cell operated by the Company has effectively improved energy efficiency. During the Period, the “Development of Energy-Saving Standardization Demonstration for Electrolytic Aluminum Production” project declared by the Group was included in the “Notice on the Establishment of National Energy-Saving Standardization Demonstration Project by 55 Units including the China General Chamber of Commerce (CGCC)” issued by the Standardization Administration of the People's Republic of China (SAC) as an initiative project, and we became the only PRC aluminum smelting enterprise being selected. For its overseas businesses, the Group entered Africa, aligning its strategies with the “One Belt One Road” initiative of the PRC government and continued to obtain successful results in the bauxite project developed in Guinea of Africa. Furthermore, the Group continued to implement its strategy of “multi-channels of overseas bauxite resources” and expanded bauxite supply from Australia, Solomon Islands and other regions which allowed the Group to maintain stable supply of upstream raw materials with more effective control over the costs of raw materials. The operation of the alumina project of the Group in Indonesia remained solid and smooth, and the benefit of the successful operation of overseas projects will continue to increase the profits for the Group in the coming future.

During the Period under Review, the Group's aggregate production volume of aluminum alloy products amounted to approximately 3,187,000 tons (approximately 3,995,000 tons for the same period in 2017), representing a decrease of approximately 20.2% as compared to the aggregate production volume in the same period in 2017, mainly due to the slight decrease of operating production capacity of aluminum alloy products of the Group as compared with the same period last year as the Group responded to the supply side reform in China aluminum industry in closing down some production lines in the second half of 2017. The Group has therefore incurred material asset impairment. As of 30 June 2018, the material loss brought by asset shut off was basically settled.

Chairman's Statement

During the Period under Review, the Group's revenue amounted to approximately RMB44,326,570,000, representing a year-on-year decrease of approximately 6.0%; gross profit amounted to approximately RMB6,511,107,000, representing a year-on-year decrease of approximately 9.6%; net profit attributable to shareholders of the Company amounted to approximately RMB1,804,265,000, representing a year-on-year increase of approximately 21.3%; basic earnings per share amounted to approximately RMB0.208 (same period in 2017: approximately RMB0.205). The Board did not recommend the payment of an interim dividend for the six months ended 30 June 2018.

After years of rapid development, the Group has initially formed an upstream and downstream full-chain operation and sales layout for bauxite mining, aluminum, electrolytic aluminum and in-depth processing products benefiting from the economy of scale. During the Period, the Group continued to increase research and development investment and strived to achieve new breakthroughs in aluminum industry technology and aluminum products application, and promoted the high-quality development of the aluminum processing industry. At the same time, the Group has continued to spend full effort to implement various energy conservation and emission reduction plans, continuously improve environmental protection technologies and make unremitting efforts to maintain ultra-low emissions and realise zero emissions.

Looking forward, the Group will continue to strengthen its core competitive edge, improve the industrial model, enhance management standard and ensure its sustainable development. In addition, the Group will further invest in research and development, actively act as a local leading enterprise in the industrial cluster to support and promote the stable development of the surrounding aluminum processing. The Group will also continuously optimize its financial structure to ensure financial stability. In the future, the Group will continue to actively respond to national policies and put in more resources on the work of energy conservation and emission reduction, as well as safety and environmental protection while making further efforts to maximize the shareholders' interest.

On behalf of the Board, I would like to extend my sincere gratitude to the Group's management team and all employees for their unrelenting efforts and dedication made in the first half of 2018, as well as to all the shareholders, investors and business partners for their support and trust.

Management Discussion and Analysis

INDUSTRY REVIEW

During the Period under Review, the international aluminum price fluctuated greatly with a decline earlier in the year before staging a significant rebound later and the upward trend was cautiously maintained for the rest of the Period. For the first half of 2018, the average prices of spot aluminum and three-months aluminum futures at London Metal Exchange (LME) were approximately US\$2,209 per ton and US\$2,210 per ton, respectively, representing a year-on-year increase of approximately 17.4% and 17.2% respectively. (Source: Beijing Antaike Information Co., Ltd. (“Antaike”))

During the Period, the price of domestic aluminum futures fluctuated widely. In the first half of 2018, the price of domestic aluminum gradually broke the weakening trend of the first quarter under the recovery of consumption in the second quarter. Aluminum price experienced a significant rise since April. Overall, the average prices of spot aluminum and three-months aluminum futures at Shanghai Futures Exchange (SHFE) were approximately RMB14,386 per ton (including VAT) and RMB14,619 per ton (including VAT), respectively, which increased by approximately 4.8% and 4.9% respectively as compared with the same period last year. (Source: Antaike)

According to Antaike, in the first half of 2018, the global primary aluminum production and consumption maintained growth momentum. The global primary aluminum production was approximately 31,690,000 tons, representing a year-on-year increase of approximately 1.5%; as for consumption, the global primary aluminum consumption was approximately 33,180,000 tons in the first half of 2018, representing a year-on-year increase of approximately 3.3%. The global aluminum industry was in short supply. Comparing with the global market, primary aluminum production in China declined in the first half of 2018 as compared to the same period of last year, yet primary aluminum consumption in China has shown a growth trend. The primary aluminum production in China was approximately 17,990,000 tons, representing a year-on-year decrease of approximately 3.2%; the primary aluminum consumption in China was approximately 17,930,000 tons, representing a year-on-year increase of approximately 2.3%, the balance in demand and supply for the aluminum industry in China was generally maintained. Management Discussion and Analysis

BUSINESS REVIEW

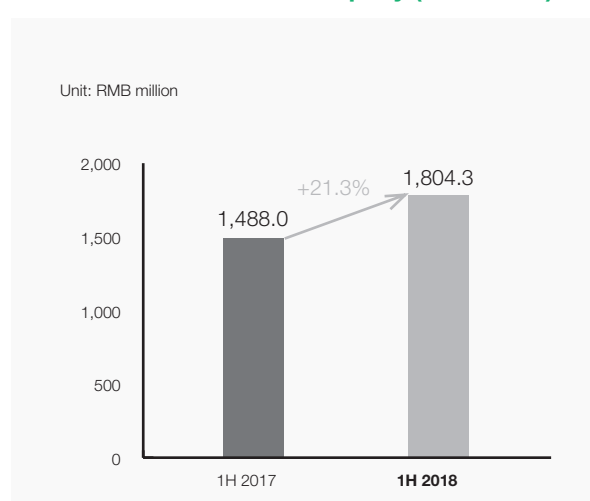

During the Period, being affected by the shut off of some production capacity in the second half of 2017, the Group's total output of aluminum alloy products amounted to approximately 3,187,000 tons, representing a year-on-year decrease of approximately 20.2%. The production volume of aluminum fabrication products reached approximately 233,000 tons, representing a year-on-year increase of approximately 14.2%.

The Group's unaudited revenue and net profit attributable to owners of the Company for the six months ended 30 June 2018 and for the same period of 2017 together with comparison figures are as follows:

Revenue (Unaudited)

Net profit attributable to owners of the Company (Unaudited)

For the six months ended 30 June 2018, the Group recorded revenue of approximately RMB44,326,570,000, representing a year-on-year decrease of approximately 6.0%, which was mainly due to the decrease in the Group's output and sales volume of aluminum products during the Period as compared with the same period of last year as the Group responded to the supply side reform in China aluminum industry in closing down some aluminum alloy products production lines in the second half of 2017.

For the six months ended 30 June 2018, the net profit attributable to owners of the Company amounted to approximately RMB1,804,265,000, representing a year-on-year increase of approximately 21.3%, mainly due to the significant decrease in impairment loss of property, plant and equipment recognized and impairment loss of goodwill recognized of approximately RMB508,486,000 as compared with impairment loss of RMB3,361,587,000 for the same period in 2017 mainly attributable to the shut off of some production capacity, which the Group accounted for as other expenses.

Management Discussion and Analysis

FINANCIAL REVIEW

The following table shows the breakdown of revenue by products for the six months ended 30 June 2018 and for the same period of 2017:

Product types	For the six months ended 30 June			
	2018		2017	
	Revenue <i>RMB'000</i>	Proportion of sales revenue to total revenue %	Revenue <i>RMB'000</i>	Proportion of sales revenue to total revenue %
Aluminum alloy products	35,949,981	81.1	43,951,328	93.2
Aluminum fabrication products	3,347,640	7.6	2,224,083	4.7
Alumina	4,766,056	10.8	970,931	2.0
Steam	262,893	0.5	21,888	0.1
Total	44,326,570	100.0	47,168,230	100.0

As for the revenue, the Group's revenue derived from aluminum alloy products was approximately RMB35,949,981,000, accounting for approximately 81.1% of the total revenue for the six months ended 30 June 2018 and representing a decrease as compared with the same period of last year, which was mainly due to the fact that the Group shut off some aluminum alloy products production lines in the second half of 2017 which resulted in a decrease in both output and sale volume of aluminum alloy products during the Period as compared with the same period of last year. For the six month ended 30 June 2018, the Group's revenue derived from alumina amounted to approximately RMB4,766,056,000, accounting for approximately 10.8% of the total revenue and representing an increase as compared with the same period of last year, which was mainly due to the increase in both sales volume and unit price of alumina of the Group.

Distribution and selling expenses

For the six months ended 30 June 2018, the Group's distribution and selling expenses were approximately RMB97,301,000, representing a decrease of approximately 34.7% as compared with approximately RMB148,992,000 for the corresponding period of last year, which was mainly due to the decrease in sales volume of aluminum products of the Group and the decrease in unit transportation cost of aluminum products during the Period.

Administrative expenses

For the six months ended 30 June 2018, the administrative expenses of the Group amounted to approximately RMB1,599,437,000, representing an increase of approximately 112.1% as compared with approximately RMB753,944,000 for the corresponding period of last year. The main reasons were that, on the one hand, the assets depreciation and staff remuneration which were accounted for as administrative expenses increased during the Period as the Group responded to the supply side reform in China aluminum industry to shut off certain production capacity in the

Management Discussion and Analysis

second half of 2017; on the other hand, being affected by the depreciation of RMB, the exchange loss of the Group during the Period increased (exchange gain for the same period of 2017 was accounted for as other income and gains). The above factors contributed to the increase in the Group's administrative expenses.

Finance costs

For the six months ended 30 June 2018, the finance costs of the Group were approximately RMB1,982,844,000, representing a decrease of approximately 4.2% as compared with approximately RMB2,070,102,000 for the corresponding period of last year. This was mainly due to the decrease of total amount of interest-bearing debt of the Group during the Period as compared to the same period of last year.

Liquidity and financial resources

As at 30 June 2018, the cash and cash equivalents of the Group were approximately RMB36,547,754,000, representing an increase of approximately 66.5% as compared with approximately RMB21,947,939,000 as at 31 December 2017. The increase in cash and cash equivalents was mainly due to the cash inflow from operating activities, investing activities and financing activities of the Group during the Period.

For the six months ended 30 June 2018, the Group had a net cash inflow from operating activities of approximately RMB5,876,949,000, a net cash inflow from investing activities of approximately RMB2,295,566,000, and a net cash inflow from financing activities of approximately RMB6,422,001,000.

For the six months ended 30 June 2018, the capital expenditure of the Group amounted to approximately RMB679,518,000, mainly for the renovation and upgrading of the environmental protection projects and construction of alumina production base.

As at 30 June 2018, the Group had capital commitment of approximately RMB1,049,303,000 representing capital expenditure for acquiring properties, plants and equipment in the future, primarily for the renovation and upgrading of the environmental protection projects and construction of alumina production base.

For the six months ended 30 June 2018, the Group's average turnover days of trade receivables for aluminium products were approximately 9 days, representing an increase of 3 days as compared with approximately 6 days for the corresponding period of last year. This was mainly because certain length of credit period was granted to the downstream clients by the Group and the corresponding trade receivables increased with the growth in the sales volume of the Group's in-depth aluminum processing products.

For the six months ended 30 June 2018, the Group's turnover days of inventory were approximately 78 days, which was almost the same as compared to approximately 79 days for the corresponding period of last year.

Management Discussion and Analysis

Income tax

The Group's income tax for the first half of 2018 amounted to approximately RMB1,138,162,000, representing an increase of approximately 86.4% as compared with approximately RMB610,592,000 for the corresponding period of last year, mainly attributable to the increase in profit before tax and the decrease in deferred tax of the Group.

Net profit attributable to owners of the Company and earnings per share

For the six months ended 30 June 2018, net profit attributable to owners of the Company was approximately RMB1,804,265,000, representing an increase of approximately 21.3% as compared with approximately RMB1,488,047,000 for the corresponding period of last year. During the Period, the basic earnings per share of the Company were approximately RMB0.208.

Interim dividends

The Board did not recommend any interim dividends for the six months ended 30 June 2018 (corresponding period of 2017: nil).

Capital structure

The Group has established an appropriate liquidity risk management framework to manage its short, medium and long-term funding needs and to satisfy its liquidity management requirements. As at 30 June 2018, the cash and cash equivalents of the Group amounted to approximately RMB36,547,754,000 (31 December 2017: approximately RMB21,947,939,000), which were mainly put in commercial banks. Considering that as at 30 June 2018, approximately RMB25,420,766,000 of the Group's debts will be due within a year, such level of cash and cash equivalents would facilitate in ensuring stable operation and flexibility of the Group's business. The Group will continue to take effective measures to ensure sufficient liquidity and financial resources to satisfy the business need and maintain a good and stable financial position.

As at 30 June 2018, the total liabilities of the Group amounted to approximately RMB106,749,288,000 (31 December 2017: approximately RMB104,947,420,000). Gearing ratio (total liabilities to total assets) was approximately 64.3% (31 December 2017: approximately 66.1%).

The Group used certain of its restricted bank deposits, inventories, trade receivables, equipment and prepaid lease payments as collateral for bank borrowings to provide funding for its daily business operation. As at 30 June 2018, the Group had secured bank borrowings of approximately RMB10,048,799,000 (31 December 2017: approximately RMB8,916,083,000).

Management Discussion and Analysis

As at 30 June 2018, the Group's total bank borrowings were approximately RMB28,428,808,000. The Group maintained a balanced portfolio of loans at fixed interest rates and variable interest rates to manage its interest expenses. As at 30 June 2018, approximately 24.1% of the Group's bank borrowings were subject to fixed interest rates while the remaining approximately 75.9% were subject to floating interest rates.

The Group aims to maintain a balance between the continuity and flexibility of funding through various debt financing instruments. As at 30 June 2018, debts except bank borrowings of the Group include RMB4,000,000,000 of short-term notes, approximately RMB41,315,453,000 of medium-term notes and bonds, approximately RMB2,952,297,000 of guaranteed notes as well as approximately RMB1,629,638,000 of convertible bonds with interest rates ranging from 4.04% to 8.69% per annum. The issuance of such notes and bonds helps to optimise the Group's debt structure and reduce its financial costs.

As at 30 June 2018, the Group had net current assets of approximately RMB24,822,399,000. The Group will continue to develop other financing channels by increasing part of the medium and long-term borrowings and optimising the structure of debts. In addition, the Group will sustain its existing production capacity advantage, control its production costs, improve its profitability and improve its cash flow position in order to maintain the adequate liquidity of the Group.

As at 30 June 2018, the Group's liabilities were mainly denominated in RMB and US Dollars, among which, RMB liabilities accounted for approximately 79.8% of the total liabilities, and US Dollars liabilities accounted for approximately 20.2% of the total liabilities. The Group's cash and cash equivalents were mainly held in RMB and US Dollars, of which approximately 98.3% was held in RMB and approximately 1.4% was held in US Dollars.

Pledged assets

Details of pledged assets of the Group were set out in note 29 to the unaudited interim condensed consolidated financial information.

Employee and remuneration policy

As of 30 June 2018, the Group had a total number of 47,829 employees, representing a decrease of 2,671 employees as compared with the beginning of the year, which was mainly attributable to the Group's implementation of the elimination system of the least competent for optimising human resources and motivating employees. During the Period, the total staff costs of the Group amounted to approximately RMB1,763,263,000, representing approximately 4.0% of its total revenue. The remuneration packages of the employees include salaries and various types of benefits.

In addition, the Group established a performance-based remuneration system under which the employees may be awarded by additional bonuses. The Group provided training programs for employees to equip them with the requisite skills and knowledge.

Management Discussion and Analysis

Exposure to foreign exchange risk

The Group collected 97.4% of the revenue in RMB and funded most of the capital expenditure in RMB. Due to the importation of bauxite and production equipment, and as certain bank balances, borrowings, convertible bonds and senior notes are denominated in foreign currencies, the Group is exposed to certain currency risks. As at 30 June 2018, the Group's bank balances denominated in foreign currencies were approximately RMB621,469,000 and its liabilities denominated in foreign currencies were approximately RMB15,854,884,000. For the six months ended 30 June 2018, the Group recognised foreign exchange loss of approximately RMB428,949,000.

Contingent liabilities

As at 30 June 2018, the Group had no significant contingent liabilities.

OUTLOOK

With the introduction of a series of policies for the aluminum industry and further reform of the aluminum market by the PRC government, the Group will face with challenges as well as opportunities in the course of its development. Under such challenges and opportunities, the Group will devote to implement the development strategies of "Integration of Upstream and Downstream Businesses", "Integration of Aluminum and Electricity" and "Global Integration" while actively responding to national policies, putting more efforts in environmental protection, energy conservation and efficiency enhancement. Meanwhile, we will focus more on technological innovation and enhance management standard further with reformation in terms of technology, talents and research and replacement of new production facilities.

Under the complex and volatile domestic and international market environment, the Group will continue to maintain its initial focus by actively carrying out its strategic plan and increase investment in research and development of key aluminum consumption sectors. With the advanced technological innovation on energy-saving, and more updated environmentally-friendly technology used in production, we will facilitate wider application of aluminum materials, help promoting the development of the surrounding aluminum processing industry and create a sustainable development system for the aluminum industry.

EVENTS AFTER THE REPORTING PERIOD

On 24 July 2018, the Company and Caseman Qinhuangdao Auto Parts Manufacturing Co., Ltd. ("Caseman") entered into the aluminum products sales framework agreement (the "Agreement") for a term ending on 31 December 2020, pursuant to which the Group agreed to sell aluminum products to Caseman. Caseman is an indirect subsidiary of CITIC group Corporation, whose indirect subsidiaries namely CTI Capital Management Limited and its related company, CNCB (Hong Kong) Investment Limited currently hold 10.04% of the total issued shares of the Company. Therefore, the transactions under the Agreement constitute continuing connected transactions of the Company. Further details are set out in the announcement of the Company dated 24 July 2018.

TO THE BOARD OF DIRECTORS OF CHINA HONGQIAO GROUP LIMITED

(incorporated in the Cayman Islands with limited liability)

INTRODUCTION

We have reviewed the interim condensed consolidated financial information of China Hongqiao Group Limited (the “Company”) and its subsidiaries set out on pages 22 to 68, which comprise the condensed consolidated statement of financial position as at 30 June 2018 and the related condensed consolidated statement of profit or loss and other comprehensive income, condensed consolidated statement of changes in equity and condensed consolidated statement of cash flows for the six-month period then ended, and other explanatory notes. The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the “Stock Exchange”) require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and International Accounting Standard 34 “Interim Financial Reporting” (“IAS 34”) issued by the International Accounting Standards Board. The directors of the Company are responsible for the preparation and presentation of these interim condensed consolidated financial information in accordance with IAS 34. Our responsibility is to express a conclusion on these interim condensed consolidated financial information based on our review, and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

SCOPE OF REVIEW

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 “Review of Interim Financial Information Performed by the Independent Auditor of the Entity” issued by the Hong Kong Institute of Certified Public Accountants. A review of these condensed consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the condensed consolidated financial statements are not prepared, in all material respects, in accordance with IAS 34.

Notes to the Interim Condensed Consolidated Financial Information (Unaudited)

For the six months ended 30 June 2018

1. CORPORATE INFORMATION

China Hongqiao Group Limited (the “Company”) incorporated in the Cayman Islands as an exempted company under the Companies Law of Cayman Islands and its shares are listed on the Main Board of The Stock Exchange of Hong Kong Limited (the “Stock Exchange”). Its parent and immediate holding company is China Hongqiao Holdings Limited (“Hongqiao Holdings”), a company incorporated in the British Virgin Islands (“BVI”). The addresses of the registered office and principal place of business of the Company are disclosed in the corporate information section to the interim report.

The Company acts as an investment holding company, the principal activities of its subsidiaries (together with the Company, referred to as the “Group”) are principally engaged in the business of manufacture and sales of aluminum products.

The interim condensed consolidated financial information are presented in Renminbi (“RMB”), which is also the functional currency of the Company and its subsidiaries in the People’s Republic of China (“PRC”) and Hong Kong. The functional currency of a subsidiary established in Indonesia is denoted in Indonesia Rupiah (“IDR”).

2. BASIS OF PREPARATION

The interim condensed consolidated financial information of the Group for the six months ended 30 June 2018 have been prepared in accordance with the applicable disclosure provisions of Appendix 16 to the Rules Governing the Listing of Securities on the Stock Exchange and with International Accounting Standard 34 (“IAS 34”) “Interim Financial Reporting” issued by the International Accounting Standards Board (the “IASB”). This interim condensed consolidated financial information should be read in conjunction with the Group’s annual financial statements for the year ended 31 December 2017, which have been prepared in accordance with International Financial Reporting Standards (“IFRSs”) issued by the IASB.

Merger accounting for business combination involving entities under common control

On 22 January 2018, Shandong Hongqiao New Material Co., Ltd (“Shandong Hongqiao”), a wholly-owned subsidiary of the Company, entered into a sale and purchase agreement with 山東魏橋創業集團有限公司, Shandong Weiqiao Chuangye Group Company Limited (“Weiqiao Chuangye”), for the purchase of 55% equity interest in Chongqing Weiqiao Financial Factoring Co., Ltd. (“Chongqing Weiqiao”), at a cash consideration of approximately RMB284,407,000. The acquisition was completed on 25 January 2018, and Chongqing Weiqiao has become a subsidiary of the Group since then. As Weiqiao Chuangye and the Company are ultimately controlled by Mr. Zhang Shiping, the acquisition of Chongqing Weiqiao was regarded as business combination under common control.

The net assets of the combining entity or business are consolidated using the existing book values from the controlling party’s perspective. No amount is recognised in respect of goodwill or excess of acquirer’s interest in the net fair value of acquiree’s identifiable assets, liabilities and contingent liabilities over cost at the time of common control combination, to the extent of the continuation of the controlling party’s interest. The adjustments to eliminate share/registered capital of the combining entity or business against the related investment costs have been made to capital reserve in the condensed consolidated statement of changes in equity. The details of the restated balances have been disclosed in note 33.

The condensed consolidated statement of profit or loss and other comprehensive income, the condensed consolidated statement of financial position, condensed consolidated statement of changes in equity and the condensed consolidated statement of cash flows for the prior periods have been restated to include the operating results of Chongqing Weiqiao as if this acquisition had been completed on 1 January 2017.

3. PRINCIPAL ACCOUNTING POLICIES

The interim condensed consolidated financial information have been prepared on the historical cost basis except for certain financial instruments, which are measured at fair values. The accounting policies used in the interim condensed consolidated financial information are consistent with those followed in the preparation of the Group's annual consolidated financial statements for the year ended 31 December 2017 except as disclosed below.

Merger accounting for business combination involving entities under common control

The consolidated financial statements include the financial statements items of the combining entities or businesses in which the common control combination occurs as if the combination had occurred from the date when the combining entities or businesses first came under the control of the controlling party.

The net assets of the combining entities or businesses are consolidated using the existing book values from the controlling party's perspective. No amount is recognised as consideration for goodwill or excess of acquirer's interest in the net fair value of acquiree's identifiable assets, liabilities and contingent liabilities over cost at the time of common control combination, to the extent of the continuation of the controlling party's interest.

The consolidated statement of profit or loss and other comprehensive income includes the results of each of the combining entities or businesses from the earliest date presented or since the date when the combining entities or businesses first came under the common control, where this is a shorter period, regardless of the date of the common control combination.

The comparative amounts in the consolidated financial statements are presented as if the entities or businesses had been combined at the end of the previous reporting period unless the combining entities or businesses first came under common control at a later date.

A uniform set of accounting policies is adopted by those entities. All intra-group transactions, balances and unrealised gains on transactions between combining entities are eliminated on consolidation.

Transaction costs, including professional fees, registration fees and costs of furnishing information to shareholders, etc., incurred in relation to the common control combination that is to be accounted for by using merger accounting is recognised as an expense in the period in which it is incurred.

3. PRINCIPAL ACCOUNTING POLICIES (CONTINUED)

In the current interim period, the Group has applied, for the first time, the following new and revised IFRSs issued by the IASB which are effective for the Group's financial year beginning 1 January 2018.

IFRS 9	Financial Instruments
IFRS 15	Revenue from Contracts with Customers and related Amendments
Amendments to IFRS 2	Classification and Measurement of Share-based Payment Transactions
Amendments to IFRS 4	Applying IFRS 9 <i>Financial Instruments</i> with IFRS 4 <i>Insurance Contracts</i>
Amendments to IAS 28	As part of Annual Improvements to IFRSs 2014-2016 Cycle
Amendments to IAS 40	Transfers of Investment Property
IFRIC-Int 22	Foreign Currency Transactions and Advance Consideration

The adoption of IFRS 9 and 15 resulted in changes in the Group's accounting policies and adjustments to the amounts recognised in the interim condensed consolidated financial information. The new accounting policies are set out in note 4 below. The application of other new and revised IFRSs in the current interim period has had no material effects on the Group's financial performance and positions for the current and prior periods and/or on the disclosures set out in these condensed consolidated financial statements.

IFRS 9 *Financial instruments*

IFRS 9 replaced IAS 39 *Financial Instruments: Recognition and Measurement*, and introduces new requirements for the 1) classification and measurement of financial assets and financial liabilities; 2) impairment of financial assets; and 3) general hedge accounting. The Group has applied IFRS 9 retrospectively to financial instruments that have not been derecognised at the date of initial application (i.e. 1 January 2018) in accordance with the transition provisions under IFRS 9, and chosen not to restate comparative information.

(a) Classification and measurements

At the date of initial application of IFRS 9, the Group's management has reviewed and assessed all financial assets held by the Group on the basis of the Group's business model for managing these financial assets and their contractual cash flow characteristics, and has classified its financial assets and financial liabilities into the appropriate categories of IFRS 9, as explained below:

Trade receivables, other receivables, loan receivables and bills receivables with recourse previously classified as loan and receivables carried at amortised cost:

They are held within a business model whose objective is to collect the contractual cash flows that are solely payments of principal and interest on the principal outstanding. Accordingly, these financial assets continue to be subsequently measured at amortised cost upon application of IFRS 9.

For the six months ended 30 June 2018

3. PRINCIPAL ACCOUNTING POLICIES (CONTINUED)

IFRS 9 *Financial instruments* (continued)

(a) Classification and measurements (continued)

Unlisted equity investment previously classified as available-for-sale investment carried at cost less impairment:

For the available-for-sale unlisted equity investments carried at cost less impairment amounting to RMB6,000,000, the Group has not elected the option for designation at fair value through other comprehensive income (“FVTOCI”) and reclassified them to financial assets at fair value through profit or loss (“FVTPL”). The Group measures them at fair value at the end of subsequent reporting periods with fair value gains or losses to be recognised in profit or loss. There is no material change in fair value as at 1 January 2018 as a result of change on classification.

All other financial assets and financial liabilities continue to be measured on the same bases as are previously measured under IAS 39.

(b) Impairment of financial assets

The Group has the following type of financial instruments that are subject to the new impairment requirements under IFRS 9.

Trade receivables/other receivables/loans receivables/bills receivables with recourse at amortised cost:

The Group applied the simplified approach to provide for expected credit losses (“ECL”) under IFRS 9 and recognised lifetime expected losses for all trade receivables/other receivables/loans receivables/bills receivables with recourse. The trade receivables/other receivables/loans receivables/bills receivables with recourse are grouped based on shared credit risk characteristics for measuring ECL.

Financial assets with low credit risk/credit risk has not increased significantly:

The Group measured a 12-month ECL in respect of the following financial instruments:

Financial assets including restricted bank deposits and cash and cash equivalents for which credit risk has not increased significantly since initial recognition.

Notes to the Interim Condensed Consolidated Financial Information (Unaudited)

For the six months ended 30 June 2018

3. PRINCIPAL ACCOUNTING POLICIES (CONTINUED)

IFRS 15 Revenue from contracts with customers

IFRS 15 superseded IAS 11 *Construction Contracts*, IAS 18 *Revenue* and related Interpretations and it applies to all revenue arising from contracts with customers, unless those contracts are in the scope of other standards. The new standard established a five-step model for determining whether, how much and when revenue is recognised.

The Group is principally engaged in the business of manufacture and sales of aluminum products.

The Group concluded that revenue from sale of goods should be recognised at a point in time when control of the asset is transferred to the customer, generally on delivery of the goods, which is consistent with the previous accounting policy. Therefore, the adoption of IFRS 15 has no impact on the timing of revenue recognition in this regard.

As required for the interim condensed consolidated financial information, the Group disaggregated revenue recognised from contracts with customers into categories that depict how the nature, amount and timing of the revenue are affected by economic factors. Enhanced disclosures are set out in note 5.

4. CHANGE IN ACCOUNTING POLICIES

IFRS 9 Financial instruments

(a) Classification and measurements

All recognised financial assets that are within the scope of IFRS 9 are to be subsequently measured at amortised cost or fair value, depending on the entity's business model for managing the financial assets and cash flow characteristics of the asset.

There are two measurement categories into which the Group classifies its financial assets:

Financial assets at amortised cost

Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest on principal outstanding are measured at amortised cost. Interest income from these financial assets is included in other income using the effective interest method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in "other income and gains, together with foreign exchange gains and losses.

Financial assets at FVTPL

Assets that do not meet the criteria for amortised cost or FVTOCI are measured at financial assets at FVTPL. In addition, financial assets that meet either the amortised cost criteria or the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces an accounting mismatch. A gain or loss on financial asset that is subsequently measured at FVTPL is recognised in profit or loss and presented in "other income and gains" in the period in which it arises.

Notes to the Interim Condensed Consolidated Financial Information (Unaudited)

For the six months ended 30 June 2018

4. CHANGE IN ACCOUNTING POLICIES (CONTINUED)

IFRS 9 *Financial instruments* (Continued)

(b) Impairment of financial assets

The Group recognises a loss allowance for ECL on financial assets which are subject to impairment under IFRS 9 (including trade receivables, other receivables, loans receivables and bills receivables with recourse). The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition of the respective financial instrument.

For trade receivables, other receivables, loans receivables and bills receivables with recourse, the Group applies the simplified approach permitted by IFRS 9 and records lifetime ECL that results from all possible default events over the expected life of these financial instruments. In estimating the ECL, the Group has established a provision matrix taking into account the Group's historical credit loss experience, adjusted for forward-looking factors specific to the debtors and economic environment.

For other financial instruments, the ECL is based on the 12-month ECL. The 12-month ECL is the portion of lifetime ECL that results from possible default events within 12 months after the reporting date, unless when there has been a significant increase in credit risk since initial recognition of the financial instrument, the allowance will be based on the lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

In assessing whether the credit risk has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with that assessed at the date of initial recognition. In making the assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. The Group presumes that the credit risk on a financial asset has increased significantly when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrates otherwise.

Despite the above requirements, the Group assumes that the credit risk on a financial asset has not increased significantly since initial recognition if the financial asset is determined to have low credit risk at the reporting date. A financial asset is determined to have a low credit risk if (i) it has a low risk of default; (ii) the borrower has a strong capacity to meet its contractual cash flow obligations in the near term; and (iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfill its contractual cash flow obligations.

The measurement of ECL is a function of the probability of default, loss given default and the exposure at default and is estimated as the difference between all contractual cash flows that are due to the Group under the contract and the cash flows that the Group expects to receive, discounted at the original effective interest rate.

For the six months ended 30 June 2018

4. CHANGE IN ACCOUNTING POLICIES (CONTINUED)

IFRS 15 Revenue from contracts with customers

Revenue is recognised to depict the transfer of promised goods and services to customers at an amount that reflects the consideration to which an entity expects to be entitled in exchange for those goods or services to a customer. Specifically, the Group uses a five-step approach to recognise revenue:

- (i) Identify the contract with the customer;
- (ii) Identify the performance obligations in the contract;
- (iii) Determine the transaction price;
- (iv) Allocate the transaction price to the performance obligations; and
- (v) Recognise revenue when (or as) the entity satisfies a performance obligation.

The Group recognises revenue when (or as) a performance obligation is satisfied, i.e. when “control” of the goods or services underlying the particular performance obligations is transferred to customer.

A performance obligation represents a good (or a bundle of goods) that is distinct or a series of distinct goods that are substantially the same. For contracts that contain more than one performance obligation, the Group allocates the transaction price to each performance obligation on a relative stand-alone selling price basis.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Group’s performance as the Group performs;
- the Group’s performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- the Group’s performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct goods or service.

Revenue of the Group is recognised at a point in time when the customer obtains control of the distinct goods or service.

At the end of the financial period/year	757,277	1,265,763

The Group tests goodwill annually for impairment or more frequently if there are indications that goodwill might be impaired. The key assumptions used to determine the recoverable amount for the different cash generating units were discussed in consolidated financial statements for the year ended 31 December 2017.

During the period ended 30 June 2018, the Group recognised an impairment loss of approximately RMB508,486,000 (31 December 2017: RMB668,694,000) in relation to goodwill arising on acquisition of Shandong Hongchuang Aluminum Industry Holding Company Limited (“Hongchuang”), resulting in the carrying amount of the CGU being written down to its recoverable amount. The impairment loss of goodwill was resulted from decline in quoted share price of Hongchuang.

23. GUARANTEED NOTES (CONTINUED)

According to the terms and conditions of the 2019 Guarantee Notes, at any time or from time to time prior to the maturity date, the 2019 Guaranteed Notes may/will be redeemed at a redemption price set forth below.

Period	Redemption price
Prior to 22 April 2019	100% of the principal amount, plus the applicable premium as of, plus accrued and unpaid interest, if any, to (but not including) the redemption date (notes i & ii)
Prior to 22 April 2019	106.85% of the principal amount, plus accrued and unpaid interest (note iii)

Notes:

- (i) Applicable premium means with respect to a note at any redemption date, the greater of (i) 100% of the principal amount and (ii) the excess of (A) the present value at such redemption date of the principal amount of the 2019 Guaranteed Notes on 22 April 2019, plus all required remaining scheduled interest payments due on the 2019 Guaranteed Note through 22 April 2019 (but excluding accrued and unpaid interest to the redemption date), computed using a discount rate equal to the adjusted treasury rate as disclosed in the offering circular plus 100 basis points, over (B) the principal amount on redemption date.
- (ii) At any time prior to 22 April 2019, the Company may at its option redeem the 2019 Guaranteed Notes, in whole but not in part, at a redemption price equal to 100% of the principal amount plus the applicable premium as of, plus accrued and unpaid interest, if any, to the redemption date.
- (iii) At any time prior to 22 April 2019, the Company may redeem up to 35% of the 2019 Guaranteed Notes, at a redemption price of 106.85% of the principal amount, plus accrued and unpaid interest, if any, to the redemption date in each case, using the net cash proceeds from sales of certain equity offerings.

The carrying amount of the 2019 Guaranteed Notes on date of issuance is stated net of issue expenses totaling US\$4,837,000 (equivalent to approximately RMB30,793,000) and the effective interest rate of the 2019 Guaranteed Notes is 9.06% per annum.

The estimated fair value of the early redemption right is insignificant at initial recognition and at the end of the reporting period.

24. CONVERTIBLE BONDS

On 28 November 2017, the Company issued convertible bonds ("CBs") bearing interest at 5.0% per annum, which were due on 28 November 2022 with an aggregate principal amount of US\$320,000,000. The CBs were denominated in US\$ and entitle the holders to convert them into ordinary shares of the Company at a conversion price of HK\$8.16 per share with fixed exchange rate of HK\$7.8212 equal to US\$1.00 at any time on or after 8 January 2018 and thereafter up to the close of business on the tenth day prior to the maturity date or if such bonds shall have been called for redemption by the holders before maturity date, then up to and including the close of business on a date no later than 10 days prior to the date fixed for redemption thereof. Unless previously redeemed, converted, purchased and cancelled, all convertible bonds outstanding on maturity date shall be repaid by the Company at its principal amount outstanding on maturity date plus accrued interest. The Company may, at the option of the holders, on giving not more than 60 days and not less than 30 days prior to the date that is three years from 28 November 2017, redeem the outstanding CBs in whole or in part at 106% of the principal amount and accrued interest to the respective dates fixed for redemption. At the issue date, the CBs were bifurcated into liability and derivative components. The effective interest rate of the liability component is 21.817% per annum.

26. RESERVES

a) Capital reserve

Capital reserve represents (i) the effect of the group reorganization completed in March 2010 and (ii) deemed capital contribution from its equity holders and (iii) amount of consideration paid by Shangdong Hongqiao in excess of the net book value of Chongqing Weiqiao acquired from Weiqiao Chuangye in current period.

b) Statutory surplus reserve

In accordance with the Articles of Association of all subsidiaries established in the People's Republic of China ("PRC"), those subsidiaries are required to transfer 5% to 10% of the profit after taxation reported under the relevant accounting policies and financial regulations in the PRC to the statutory surplus reserve until the reserve reaches 50% of the registered capital. Transfer to this reserve must be made before distributing dividends to equity owners. The statutory surplus reserve can be used to make up previous year's losses, expand the existing operations or convert into additional capital of the subsidiaries.

c) Translation reserve

Translation reserve comprises all foreign exchange differences arising from the translation of the financial statements of foreign operations.

27. FAIR VALUE DISCLOSURES

Some of the Group's financial assets and financial liabilities are measured at fair value at the end of the reporting period.

For financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

* Financial assets designated as at FVTPL represent unlisted equity investments.

Fair value measurements and valuation process

In estimating the fair value of an asset or a liability, the Group uses market-observable data to the extent it is available. Where Level 1 inputs are not available, the Group engages third party qualified valuer to perform the valuation. The chief financial officer works closely with the qualified external valuers to establish the appropriate valuation techniques and inputs to the model. The chief financial officer reports findings to the board of directors of the Company semi-annually to explain the cause of fluctuations in the fair values of the assets and liabilities.
